OPERATION SEA LARDS SUMMARY December 1968

During the month Operation SEA LCRDS continued to expand the U. S. Navy area of operations on the inland waterways of the III and IV Corps Tactical Zones. Working with both U. S. and Vietnamese ground units, the combined afforts of the three Mavy task forces made significant progress in the interdiction, pacification, and harasament campaigns.

Interdiction patrols continued on the Each Gia-Long Kuyen Canal in Kien Giang Province and along the Cambodian border on the Each Giang Thanh and Vinh Te Canal. Combined PSR/ASPS patrols on the Rach Gia-Long Kuyen Canal were supplemented by frequent Regional Force (RF) sweeps along the canal banks. On the Vinh Te enemy opposition encountered early in the month was met by occasional employment of RF and CLDG sweeps and adding ATC's to the patrol force until falling water levels prevented ATC operations late in the month. An ATC was also employed with the PCF's operating on the Rach Giang Thanh. Here it was found that night patrols using night observation devices gave the patrol units an advantage over the enemy in ambush situations. U. S. Navy SEAL operations were also carried out along the Vinh Te Canal early in the month. Enemy opposition to these two interdiction campaigns decreased significantly toward the end of December.

A third interdiction campaign was initiated with Operation GIANT SLING-SHOT on 6 December. River Patrol Force and Hobile Riverine Force units have operated on the Vam Co Tay and Vam Co Dong up to 35 miles west and 50 miles northwest of Saigon in an effort to cut enemy infiltration from the "Parrot's

DECLASSIFIED CONFIDENTIAL

COASTAL SURVEILLANCE FORCE SUMMARY December 1968

Coastal activity increased during December as detections of junks and sampans rose by nearly 15,000 to 47,814. Task Force 115 units checked 74 percent of the craft detected by carrying out 19,626 inspections and 14,353 boardings. A total of 1,119 persons were detained for improper papers or other suspicious activity. There were 1,450 detections of steel-hulled vessels in MARKET THE areas during the month. No suspicious activity was disclosed by the 970 inspections and 82 boardings carried out to check these vessels. In addition to normal surveillance operations in the MARKET TIME areas, "Swift" boats assumed patrol duties on the lower portions of the Co Chien, Ham Imong and Soirap Rivers. This permitted redeployment of Task Force 116 patrol craft for Operation SEA LORDS' counter infiltration campaigns. On the rivers, PCF's of Task Force 115 detected 11,687 craft, inspected 2,407, and boarded 6,617.

Naval gunfire support and river intrusion operations also increased during December. Of the 43 river operations carried out, all but two took place in IV CTZ as a part of Operation SHA LOADS. Also in support of Operation SHA LORDS, two "Swift" boats conducted daily patrols of the Rach Giang Thanh to counter enemy infiltration along the Cambodian border. Hostile fire was encountered on 23 of the river incursions, resulting in three USN and one VNN killed, 28 USN and one VNN wounded, and 17 "Swift" boats damaged. Enemy losses to gunfire from the MARKET TIME units during Enclosure (2)

CROUP 4

Downgraded at 3 year intervals
Declassified after 12 years

the river raids and 889 additional gunfire support missions came to 1,405 craft and structures destroyed plus 1,006 heavily damaged, 119 killed (68 body count plus 51 probable), and 47 wounded (10 body count plus 37 probable).

On the morming of 6 December, PCF 36 and FCF 38 were patrolling up the lach diony Them when they were subushed seven miles northeest of Ha Fion. The enemy fired on the two patrol craft from both beaks of the river with small arms, 57-am recoilless mifles and B-40 rockets. Machine gun, small arms and grenade fire from the "Swift" boats partially suppressed the hostile fire as they cleared the ambush area. The craft beached at Tra Pho, a short distance upriver, to care for the nine crewmen wounded (three seriously). In addition, one crewman was killed in the action and one VNN lost overboard and another wounded. No B-40 or recoilless mifle rounds scored direct hits, however, both craft were damaged by numerous small arms hits. During the return downriver through the ambush area, cover was provided by a Task Force 116 light helicopter fire team that saturated the enemy positions with rockets and machine gun fire. Due to the dense cover along both banks the enemy was unseen throughout the engagement and enemy losses were unknown.

On the morning of 10 December, PCF 70 and PCF 39 entered the Cua Dai River 12 miles southeast of Danang to take enemy bunkers upriver under fire. As the two craft were proceeding back out to sea after destroying seven bunkers, heavy automatic weapons fire was received from three sites at

Enclosure (2)

very close range. The enemy fire was returned killing at least one Viet Cong. After clearing the area, the craft proceeded to the Coastal Group LA base for treatment of five wounded crewmen. A naval gunfire support mission was fired on the ambush site by USS CKLAHGA CITY (CLC-5) with unknown results.

When an Army unit was taken under fire by an estimated WA company 15 miles north of Quang Mhai on the 15th, POF 18 was called for urgent naval gunfire support. Quickly responding with 39 rounds of mortar fire, the enemy attack was repulsed. A sweep of the area revealed eight bodies and numerous blood trails plus other human parts indicating heavy enemy losses.

An Operation STA LCRDS mission on 27 December took six "Swift" boats supported by helicopters, fixed wing air strikes and a Seventh Fleet destroyer into the previously unpenetrated Hang Ho, Bo Gui and Dam Doi rivers. Moving north up adjoining canals, the MARKLE TIME units probed a Viet Cong headquarters area near the southern tip of Vietnam. During the five-hour-long operation, 30 sampans, 15 structures and four river barriers were destroyed. Another 30 sampans and 24 structures were damaged. During a brief but intense battle, as the craft headed back to sea via the Cua Lan River, one Viet Cong was killed and two crewmen received minor wounds.

On the night of 26 December, PCF 88 closed the shore three miles west of Ha Tien to illuminate a possible contact. The illumination

Enclosure (2)

rounds apparently revealed the positions of a Khmer Kampuchea Krom (KKK) and Viet Cong unit because a fire fight broke out between the two units ashore that lasted for several hours. Friendly units at Ha Tien stated they were not involved and intelligence reports indicated that the Viet Cong had lost 22 killed and the KKK 15 killed and 7 wounded.

Enclosura (2)

RIVER PATROL FORCE SUMARI December 1968

The operations being conducted in support of Operation SEA LORDS e.g., Operation GIANT SLINGSHOT, Vinh Te Canal Campaign and Rach Gia-Long Kuyen Canal Campaign, have taken some RIVPATFOR units off the major rivers of the Delta. Accordingly, there has been a corresponding decrease in numbers of contacts detected and number of persons checked as was expected when moving these units to less dense areas of population and traffic. By assiduous use of previous experience and tactical intelligence, Task Group commanders have positioned their remaining patrols to counter the enemy in the most active areas. This has balanced somewhat the decrease in detections and search and is believed to be the best solution possible under the above circumstances. To further offset the decreased patrol capability of the major rivers by GAME MARDEN units, PCF's of TF 115 began patrolling the lower Ham Luong River as part of Operation SEA LORDS. On 12 December TF 115 was further tasked with patrolling the lower Co Chien and Soirap rivers as part of SEA LORDS. On 28 December TF 115 relieved TF 116 of patrol responsibilities of the lower Ham Luong and Co Chien rivers. During this month PBR's of TF 116 detected 190,913 watercraft and conducted 45,513 inspections and 81,218 boardings.

Intelligence reports during the month looked for the start of the enemy's winter-spring offensive. Initial reports indicated that a large scale offensive could be expected by the 22nd of the month, this was

GROUP 4
Downgraded at 3 year intervals
Declassified after 12 years

Enclosure (3)

DECLASSIFIED

later revised to the 25th and eventually was forecast to occur sometime in January. The delay in the start of the offensive was attributed to the apprehension of a considerable number of enemy sapper/commo-liaison agents within the Capital Military District and the disruptive effections of allied operations, in particular the GLANT SLINGSHOT patrols of the Van Co Cong/Van Co Tay rivers, on enemy movement of personnel and supplies.

There were four attacks against merchant ships on the Long Tau during this reporting period. On 3 December, a mine detenated about 10 meters astern of the SS COPHER STATE and 500 meters ahead of the SS COMYAGUA with no friendly casualties or damage. On 4 December, a detonation occurred midships, outboard side, of the SS KARA which was moored alongside the Shell Pier at the Wha Be Fuel Farm. The vessel suffered minor damage but there were no friendly casualties. On 17 December, the MSTS ship CAPE SAN MARTIN came under attack while proceeding north on the Long Tau. All rockets missed the ship. On 20 December, the SS PIONAER MING was attacked by rockets about 18 miles south-southeast of Saigon with no friendly casualties.

On the evening of 1 December, a PER on routine patrol encountered a junk 75 feet away from the quay wall at Tra On sub-sector compound, about 10 miles southeast of Can Tho. When approached by the PER's the junk exploded. Investigation revealed that three persons were in the junk as well as a 105-mm howitzer round rigged as a booby trap. The trio had earlier attempted to take the booby trap into the Tra On sub-sector compound but were turned away and told to dump it into the river. The trio remained

Enclosure (3)

Costibarile ...

DECLASSIFIED ROWFINE MALINE

on the river approximately one hour prior to the arrival of the PBR's.

After the junk exploded, the PBR's approached the Tra On sub-sector compound. Upon receiving two sniper rounds from the town complex they withdraw. As the PBR's were withdrawing, a hand grenade exploded in the midst of the civilian provid which had gathered outside the compound, willing nine civilians and wounding 17. Intelligence evaluation concluded that this incident may have been initiated by a Viet Long terrorist equad with Tra On sub-sector compound as the primary target and the PBR's.

While on surveillance patrol in the early evening of 2 December, Seawolves 76 and 78 observed 12 sampens, about 12 miles northeast of Rach Cia, in the process of loading/reloading. They proceeded to place multiple strikes on the target until they had expended all of their assumption. They observed three direct rocket hits on extremely heavily loaded sampans with occupants and other loading personnel hit by heavy weapons fire. Damage estimates were six sampans destroyed and six damaged. Enemy personnal casualties were listed as eight probably killed and seven probably wounded. There were no U. 5. casualties.

TU 116.7.3 proceeding to an harassment and interdiction mission in response to intelligence on the morning of 12 December came under heavy automatic-weapons and B-40 rocket fire from both banks of a canal 5 kilometers east of Sa Dec. The cover boat was hit by a B-40 rocket which caused it to lose steering control. When the lead boat reversed course in order to make a covering firing run both units again came under intensa

DECLASSIFIED CONFIDENTIAL

B-40, recoilless-rifle and automatic-weapons fire. Both boats received B-40 and numerous weapons hits. Seawolves and additional PBN's came to the assistance of the attacked boats and they were able to withdraw to a friendly outpost. Both boats beached and the wounded were medevaced by Seawolves. One of the PBN's was then towed to Da Dec while the other was left for future salvage. Salvage attampts on the 13th were unsuccessful but on the 14th with the aid of two LCM's the PBN was miled to higher ground where rocket hits beneath the vaterline were plugged and the vater pumped out. After refloating the PBN it was towed to Sa Lec. Friendly casualties were two killed in action and four wounded. Energ casualties based on a report of a reliable Vietnamese agent were placed at 17 killed by PBN and Seawolf fire.

At approximately three o' clock in the morning on 13 December, 78A 731 and ASP8-111-5 were patrolling the Vam Co Tay River, as part of Operation CLANT SLINGTHOF, when they were ambushed 8 miles southeast of Hoc Hoa. The ambush site was 100 meters long on both banks of the river with one .50 caliber machine gun at each end of the site on the north bank. Initial firing by the enemy knocked out communications on primary radios on both boats. After about 15 minutes the ASPB was able to contact the special forces personnel at Moc Hoa on a PRC-25. Two Army gunships were scrambled to go to the aid of the boats. The PBR and ASPB returned the fire of the enemy and the Army gunships made one firing run on the north bank suppressing fire. Additional PBA's, ASPB's and Seawolves were sent to the area

Enclosure (3)

DECLASSIFIED CONFLOED INL

to provide security. The PBR was beached and the wounded medevaced. The ASPB with PBR's and Seawolves providing security was towed to Tuyen Mhon. The PBR proceeded to INDM-18 under its own power. The PBR had suffered three mPC-7 and numerous small arms hits. U.S. cumualities were five wounded on the PBR and three on the ASPB. Energy casus thies are unknown.

Late in the afternoon of 14 Docember, Fill's 717 and 750, presenting is TV 194.7.1, a part of Coerction CLA T SITULEOF, completed 2 s outling mission for an artillary striks and were returning to Chair patrol of the Vam Co Dong River when they came under heavy automatic-versions and rocket fire about 25 miles west of Fhu Chong. The fire was returned and the units cleared the kill zone. Semwolves scrambled and additional surface units came under attack about 3 miles north-northwest of Hisp Hoa while shrouts to the scene. An Army help team which had also been scrambled placed a strike in the area and the LNFT provided cover and security for the PRR's. Four of the more critically wounded Havymen were medevaced, one of these subsequently died of wounds. Two other PBR personnel were also wounded. Enemy losses are unknown.

While transiting south on Vam Co Bong River mid-afternoon on 29

December, PBH's 8131 and 8134, GIANT BILINGSHOT TU 194.9.4, received

B-40 rocket and automatic-weapons fire from the south bank of the river about five miles south of Tay Ninh. The units returned the fire and cleared the area. One rocket struck PBR 8134 starboard side coxewain flat armor plate causing massive shrappel damage. U.S. casualties were the patrol

Enclosure (3)

COMPLIBITIAL N L

OFFICER killed and three others wounded, one of them seriously. Enemy casualties are unknown.

During the month, a number of enemy arms caches were uncovered and seized. A listing of the items seized at the larger caches may be found on page 2 of enclosure (5). In addition to the arms caches two incidents involving medical sumplies occurred. One of these was a summen sampan on the east tank of the Yam Co long River, which contained over 00 norphine syrottes and 10 suburing kits. The sits was later identified as one that had been used previously as a Yist Cong medical aid area. The other incident involved an ARTH soldier found aboard a water taxi without the proper papers for the A6 bottles of various type anti-biotics he was transporting. He was turned over to the Senior Advisor Kien Hoa Province for disposition. A routine inspection of a junk by a PER on 15 December resulted in the confiscation of over 2700 pounds of U.S. Handelasp powdered milk and 60 gallons of Handelasp salad oil by U.S. authorities and the turning over of 3100 pounds of unmanifested sugar to MILO My Tho for disposition.

Enclosure (3)

OF DED EASSIFIED

December 1968

Riverine warfare in December was again characterized by interdiction, escort and patrol, base area search and pacification operations.

Small writ actions over wide areas in Kien Hoa, Kien Giang, Choung Thien, and An Kuyen provinces accounted for high Viet Cong killed. Mobile Siverine Group ALFRA operations were confined for the most part to activity in Kien Hoa Province, and the support of the 2nd Brigade, U. S. Minth Infantry Division. Mobile Riverine Group BRAVO operations consisted largely of a variety of special operations in the southern delta region in coordination with units of the 2nd, 3rd and 4th Battalions of Vietnamese Marine Corps.

The following table shows river assault craft employment an a typical day in December and is indicative of the present scope of operations:

TASK GROUP 117.1 OPERATIONS

During December, Mobile Riverine Group ALPHA engaged in a series of operations (designated Kidney Flush) designed to keep constant pressure on the Vist Cong. With frequent insertions in Ham Long, Mo Cay and Truc Giang districts of Kien Hoa Province, Army ground elements continued to seek out and destroy the enemy. These operations employ riverine, air and ground assets and have produced significant attrition a sinst the enemy. The daily toll to the Viet Cong has been approximately 10 dead coupled with loss of supplies and equipment. Of the many detainees taken during these actions, about 20 percent are subsequently classified as Viet Cong, while the remainder are determined to be innocent civilians.

Might ambush patrols have now been incorporated into the operations of the 3/60th Infantry. This is a definite change in MRF procedures, as might landings were previously avoided as too dangerous. The procedure being followed is to rest the troops during the day, land them after dark,

> CONFIDERALIAL DECLASSIFIED

and extract them the following norming. This is the same method successfully employed by units of the Ninth Infantry Division in Long An Province and last month in Giong Trom District of Kien Hoa Province.

During the month RAD 92, with infantry embarked, escorted two Army supply convoys composed of ICU's and ICM-8's from Dong Tam to the Special Forces camp at Noc Hoa. Directed from a command and control helicopter, these convoys were heavily supported by artillery, assault helicopter companies and embarked troops and proceeded via the Cho Gao Canal, Vam Co and Vam Co Tay rivers. The convoys are providing support for airfield improvement in the Moc Hoa area.

RAD 132 with six ASPB's from RAS 9 and 11 sailed to MRC "A" on 30 Movember and chopped to CTO 117.1 on 1 December. The units then joined elements of TF 116 in Operation GLANT SLETGSHOT in the Vam Co Tay and Vam Co Dong rivers. CTG 194.0, FIRST SEA LORD, directs the conduct of this operation.

The following hostile fire incidents are selected to briefly outline the circumstances under which two Navymen were killed in action and seven sailors were wounded:

1. While inserting an Army intelligence gathering Long Range Reconnaissance Patrol (LHRP) at a position 3 miles southwest of My Tho, units of RAD 91 received B-40 rocket and A/W fire. ATC-91-8 received thr B-40 rocket hits, one forward and two below the waterline. One U.S.A' soldier was killed, eight were wounded and seven Mavy crewmen were wou

DECLASSIFIED.

- 2. On an Operation SLIBSSHOT mission on 2h December, two ASPB's enroute to a preplanned ambush site with 1st Air Cavalry elements on board, came under fire at a position 7 miles south of Kiep Hos on the Vam Co Dong River. During the attack, the boat captain of A-91-5, EM2 Wallace GOILD, USN, was killed. Another cremman was wounded. There was abily light damage to the ASPB's.
- 3. On 27 December at 2105H, a patrol in support of Operation SEA LORES and consisting of one ASPB, three PBR's and one ATC was proceeding south on the Each Gia Long Kuyen Canal when the patrol was attacked at a position 3 miles northeast of Each Gia. One sailor was killed and three others were wounded as the ATC received 3 hree 2-40 rocket hits. Fire was returned as the patrol withdraw to the south. Two "Seawolf" LHFT were scrambled and placed strikes on the suspected enemy positions.

TASK ORCUP 117.2 OFFRATIONS

The first five days of the month were utilized for the completion of boat maintenance in preparation for subsequent operations.

On 5 December, RAD 15 got underway from the MRB at Can Tho with 30 assault craft for operations in base area h80. Three companies of the 4th Battalion VRMC came aboard on 6 December and the task unit proceeded to the area to begin operations which lasted until the 11th. Throughout the period VRMC troops conducted ground sweeps in selected locations and the RAC patrolled in the general area within a 10 mile radius to the south and southeast of Kien Hung on the Cai Lon River. Enemy reaction to the MRF

DECLASSIFIED

DECLASSIFIED PERFIADIAL

presence came in the form of 12 B-40 rocket ambushes during the period.

The fire was returned and suppressed in all but the one instance in which there were friendly troops in the area. Two assault craft were damaged as a result of these actions and four USN wounded. On two separate occasions, B-40 rounds became lodged in the styrofoam on an ATC and a Zippo, and failed to detonate. This operation proved to be one of the most successful to date and resulted in 55 Viet Cong killed. Only one friendly VCC was killed. In addition to the large body count, a Viet Cong prison camp was discovered by VCCC units, resulting in the release of 10 Vietnamese prisoners. Several tons of weapons, assumition and military supplies were captured or destroyed. The units returned to the MRB on 11 December.

The Mobile Riverine Force concept was projected into the open sea for the first time attendant to the conduct of Operation SLIVER MACE (TG 194.2) in the western end of the Gua Lon River. Operating as units of Operation STA LORDS, monitors, ASPB's and ATC's, with one mobile strike force company from Binh Thuy embarked, began late on the night of 16 December and transited Phong Dinh, Chuong Thien and Kien Giang provinces and the western coast of South Vietnam in 36 hours. Meanwhile, the USS MINCER (APB39) with another MEF company and a 30 man UDT/ECD element embarked, USS SATTR (ARL23) and USS INEDRAL COUNTY (LOT839) (support/resupply LOT) proceeded to the rendezvous point in the Gulf of Thailand in three separate transits via the South China Sea and around the southern tip of Vietnam. Rough seas delayed the commencement of the operation designed to destroy a series of 12 fish

Inclosure (4)

GONSHIENILAL

DECLASSIFIED

After encountering difficulty on mud flats at the Cua Lon entrance, the tesk unit succeeded in transiting the shallows with the aid of a VNN jurk pilot. Strike forces were positioned on the bank and UDT/ZOD units commenced destruction of the barricades. Meeting light enemy resistance, the SILVER MACE forces had completed barricade destruction on the morning of 22 December, and the task unit began withdrawal from the area.

Can Cao Canal in the area 19-20 miles southwest of Rach Gia, enemy amiushes against the assault craft produced significant friendly casualties on two occasions. While underway to land units of the 2nd and 3rd battalion VIPC, EAC 15 craft encountered B-40 rocket and automatic weapons (A/W) fire from both banks at 310845H. Although enemy fire was returned and suppressed, one ATC and one monitor were damaged by rocket hits and seven USN were wounded. Later that might between 1950H and 2045H, in the same area, the RAC, again with VEAC troops aboard, came under attack three times and received 40 to 50 B-40 rockets and heavy A/W fire. ATC-151-12 received four B-40 hits, ATC-152-13 received one B-40 hit and ATC-151-6 sustained three B-40 hits producing heavy casualty figures of 10 USN, 28 VANC and 3 VAN wounded. Enemy fire was returned by the RAC in all cases and at 2145 two "Seawolf" gurships and USAF "Spooky" expended 21,000 rounds on the suspected enemy positions.

NAVAL ADVISORY GROUP SUMMARY December 1968

Four more PCF's were turned over to the Vietnamese Navy (VNN) this month to bring the total of VNN PCF's to 12. On 27 December, two PCF's conducted the first VNN river patrol in conjunction with Operation SEA LORDS when the Cai Lon River was penetrated into areas never before reached by VNN craft. This first mission was designed as a familiarization with SEA LORDS operations; there was no enemy contact made during the 25-mile trip. In addition, derivative benefits came from a VNN craft flying the Vietnamese flag throughout the passage and in the small Delta village of Kien Hung.

Brigade A, Vietnamese Marine Corps (VNMC), composed of the 1st and 2nd Infantry Battalions and Battery B, VNMC Artillery Battalion, operated in the vicinity of Tay Ninh under the operational control of the 25th ARVN Infantry Division during Operation SONG THAN. The brigade met with no significant enemy contact during the deployment of 1-9 December. On 10 December, the brigade retired to the base camp at Thu Duc.

Brigade B was composed of the 4th Infantry Battalion and Battery D, VNMC Artillery Battalion ffom 1 through 18 December and participated in Operation SONG THAN under the operational control of the Zist ARVN Infa Division in Chuong Thien Province. On 10 December, the marines were c with 41 enemy killed and 6 captured along with a large quantity of we and ammunition. The VN marines suffered seven wounded during this to the 2nd Infantry Battalion relieved the 4th Infantry Battalion on ?

and on 2h December the 3rd Infantry Battalion joined the brigade. On 28 December the marines, under the operational control of the 21st ARVN Infantry Division, participated in amphibious operations in close coordination with the U.S. Mobile Riverire Force in the northern U-Minh Forest area. On 31 December the marines incurred 28 wounded when the RAS craft in which they were riding came under enemy attack. A firefight ensued with unknown enemy casualties.

The newly instituted Amphibious Task Force (ATF), composed of the 3rd Infantry Battalion, VNN RAG 21/33 and the ARVN 7th and 9th Infantry Divisions, began conducting operations in the My Tho/Ben Tre areas this menth and participated in operations SONG THAN and KIDNEY FLUSH. The fledging ATF recorded little enemy contact during its first month of operations.

The 5th and 6th Infantry battalions operated in and around Tay Ninh this month conducting reconnaissance-in-force and small unit patrols on individual assignments. The 5th Battalion was committed to the U.S. 1st Air Cavalry Division and the 1st Airborne Brigade while the 6th Battalion pursued the enemy under the operational control of the ARVN 5th and 25th Infantry Divisions.

PSYCHOLOGICAL AND CIVIC ACTION OPERATIONS December 1968

This month 25 Hoi Chanhs rallied to naval forces. The total for this year stands at 235, which is a 46 percent increase over last year's total. The vast majority (153) of these people have rallied during the last four months.

In conjunction with Operation GIANT SLINGSHOT, laud speaker operations were conducted extensively along the Vam Co Dong River. Quick reaction leaflet drops and aerial loudspeaker broadcasts exploited the psychological vulnerabilities of the enemy generated by the presence of U. S. Naval forces, and in particular Navy SEALs, in the areas of the Cai Lon, Bo De and Ong Doc rivers, the Rach Gia-Long Xuyen Canal and Phu Quoc Island. The presence of U. S. Forces along the Rach Gia-Long Xuyen Canal has had a strategic effect upon pacification by gaining vital lines of communications and allowing refugees to resettle in their former homes under secure conditions. Psychological operations in this area were also conducted in the form of MEDCAP and MILCAPS to solidify the gains made in the pacification program. The response of the people to these efforts was enthusiastic. Speaker operations and MEDCAPs were also continued along the major Mekong River complex. An insight into the value of waterborne speaker operations might be gained from the following incident: In My Tho through various sources the names of seven members of the Viet Cong infrastructure were gained. These people were appealed to by name in speaker operations urging them

DECLASSMELESTED

UNCLASSIFIED

to rally to the government cause and guaranteeing their personal safety. Two of those appealed to subsequently rallied to the government.

In the Rung Sat Special Zone a major effort was made in pacification to upgrade Ly Mhon village, formerly rated a contested area. PSIOPS were conducted during the month in the form of MEDCAPs, entertainment troups and speeches by the District Chief urging the people to rally behind the government. The results were most effective as evidenced by the radical change in attitude by the populace for the government.

Throughout the rest of the country daily PSYOPS were conducted utilizing the themes of voluntary informant, Chieu Hoi, support of the government and the progress of the Paris Peace Talks. There was also continued use of Armed Propaganda Teams (ex-Vist Cong) participating in live speaker broadcasts.

During the month in excess of 50 NHDCAPs were conducted and 13,862 persons were treated.
